

HENRY ROUTSON

Henry_Rou@ProtonMail.com | 0419 108 859 | <https://www.linkedin.com/in/henryroutson/> | Melbourne, VIC

EDUCATION

The University of Melbourne Jun 2021 – Dec 2024
Bachelor of Science, Major in Computing and Software Systems – 76 average mark

Ballarat Grammar Sep 2020

- Academic scholarship
- VCE: Software Development, Specialist and Methods Mathematics, Chemistry and Physics

EXPERIENCE

Aerospace and Rocket Engineering Society ([ARES](#)), The University of Melbourne Jan – Jul 2023
React and TypeScript / JavaScript Developer

- Supports creating rocket trajectory simulations to inform rocket ballast and airbrake deployment configuration in competition to get as close to 30,000 feet as possible.
- Collaborated with industry software developers and Master of Computing students in React 3JS Fibre
- Implemented fins with a dynamic count into a 3JS 3D render

Flight Simulations Python Developer Jul 2023 – Nov 2023

- Automates trajectory optimization for rocket simulations to improve efficiency, reliability, and accuracy

Open-source contribution

[Cached File Explorer - in rust](#)

- Isolated poisoned thread issue to minimal reproducible steps, and created a pull request bug fix which was merged into the project

[Supabase Auth UI](#)

- Allowed additional UI configuration options and added documentation to one of the most popular flutter packages.

Queen's College IT Support, The University of Melbourne 2022

- Supported 350 students and staff across various technical issues

SELF-DIRECTED PROJECTS

Social app 2024
Firebase, Supabase, Flutter, database integration, user authentication, Expo, Typescript, cloud functions

Leetcode Competitive Programming 2021 – Present
<https://leetcode.com/HenryRoutson/>

CHelp - in C 2023
<https://github.com/HenryRoutson/CHelp>

- Utilised meta-programming to track dynamic memory in C and improved debugging and bug detection abilities for C programmers
- Developed cross platform program that displays data and location of un-freed allocations on program completion, and allows checks for the number of different types of allocations

AutoHeader - in Rust 2022
<https://github.com/HenryRoutson/autoheader>

- Implemented "Public" keyword into C programming language to automate the creation of header files
- Uses automated testing and regular expression.

Soil Nutrient Calculator - in Python (VCE Software development)

2019

- See video [here](#).
- Architected GUI Software for a multi-million dollar business which performs Vector calculus to find the ideal compost for any soil and crop combination
- This remains in use, quantifying the product value to customers and continuing to improve their crop yield and quality

ACADEMIC PROJECTS AND PERFORMANCE

The University of Melbourne Subjects

Machine learning

- Created a stacked model including a neural network

[IT Project](#) (JavaScript / TypeScript, React, HTML, CSS)

- Our project utilises React to build on quicksort algorithm visualization software
- Improved code standards and redesigned stack visualization to improve students ability to understand the quicksort algorithm.
- Try Here! <https://dev-aia.vercel.app/>

Models of Computation (Haskell)

- My Haskell code was chosen as the solution for numerous practice problems within a cohort of 600

Computer Systems (C)

- Developed functional memory allocator for operating systems and a multi-threaded web server

Algorithms and Data Structures (C)

- Implemented a Quadtree, Linked list, Dijkstra and A*

Foundations of Computing (Python)

- Achieved overall 98%, one of the highest marks in the cohort

ENGAGEMENT

- UniMelb Competitive Programming Club – Participant

2022
