Henry Routson

Melbourne, VIC | Henry_Rou@ProtonMail.com | 0419 108 859 | linkedin.com/in/henryroutson | github.com/HenryRoutson

Embedded AI engineer shipping production-grade GenAI: agentic workflows, typed data pipelines, evaluation, and observability. Master's in AI (in progress).

Education

The University of Melbourne
Master of Computer Science, AI — *in progress, part time*

- NLP: Fine Tuning, Prompt Tuning, Transformers, Hugging Face

The University of Melbourne
Bachelor of Science, Computing and Software Systems — *Distinction*

Ballarat Grammar — Academic scholarship; VCE Software Development, Specialist & Methods Mathematics

Achievements

Antler VC Build Hackathon, 1st Place Jun 2026
antler.co | Event page

- Won 1st place and $7,500 at Antler's two-day Sydney sprint.
- Built auto-pipeline.dev and auto-pipeline-app.dev in 14 hours.

Experience

KPMG, AI Engineer Jul 2025 – Present
kpmg.com/au/en.html

- Promoted March 2026.
- Embedded AI Prototype Engineer in Futures: technical discovery through production-grade LLM and agent systems.
- Shipped a 34k-line Python platform for prompting, structured parsing, Pydantic validation, and deep research.
- Built pipelines over unstructured and structured data: 10k-page legislative assessment; SQL migration and database merge.
- Multi-agent and hierarchical sub-agent systems with Recursive Language Models (RLM); deployed Transformers on CUDA (Hugging Face, Ollama).
- *Skills:* Python, Azure, FastAPI, Pydantic, LangChain, LangExtract, Hugging Face, Docker, Ray, Pandas, DeepSeek-OCR, Ollama.

Viscerl, Founder Oct 2026 – Present
visce-rl.com

- Vibe-coding product for RL environments: describe an activity in plain language; humans play it or agents call it over MCP.
- 40+ example environments across medical, science, finance, games, puzzles, and workplace computer-use.
- RL environments connecting frontier labs and enterprise — invent and prove the world before packaging for training.
- *Skills:* Next.js, TypeScript, Python, MCP, coding agents (Claude Code, Codex CLI, Cursor, OpenCode), DeepSeek, SVG envs, Vercel.

Antler Australia, Residency (AS16) Jul 2026 – Aug 2026
antler.co/location/australia

- 80 selected from 1,600 applicants for Antler Australia's inception-stage VC residency (Sydney, Melbourne, Brisbane).
- 10-week full-time program: co-founder matching, idea validation, and pre-seed investment pathway.

Bet Right, Data Science Intern Jan 2025 – Apr 2025
linkedin/bet-right

- Financial-services data stack: SQL, Snowflake, Databricks, PowerBI, Azure, DevOps.
- Improved abuse-detection ML model by 15–40% using stacking.

DSCubed, DS/AI Team Vice Head Nov 2024 – Jul 2025
dscubed.org.au

- RAG, vector databases, and LLM APIs for student-facing AI applications.

ARES, TypeScript Developer, University of Melbourne 2023
linkedin/aresunimelb

- 3D front-end for rocket trajectory simulation (supersonic and subsonic).

Technical Skills

GenAI / agents: multi-agent systems, MCP servers, tool calling, RAG, vector databases, structured extraction, Pydantic, Zod, JSON Schema, schema validation, human-in-the-loop, typed pipelines
Eval / observability: evaluation pipelines, granular tracing, tokens/sec, cost-per-request, latency, Langfuse, prompt profiling, A/B testing, LLM-as-judge
Data / cloud: Python, TypeScript, SQL, Rust, FastAPI, Azure, Docker, Postgres, Snowflake, Databricks, OCR, APIs, CI

Certifications

Microsoft Certified: Azure Fundamentals Apr 2025
learn.microsoft.com

Open-Source

Cached File Explorer (Rust) — PR #47: poisoned-thread fix; caching / low-level Rust.

Supabase SQL Auth UI — PR #108: options and docs.

Projects

IT Project (JS/TS, React) dev-aia.vercel.app

- Quicksort visualisation; redesigned stack visualisation and improved code quality.

LLM Experiments github/llm_experiments

- Transformers, JAX, Keras, PyTorch; pre-training plus supervised fine-tuning.

Auto Avail (TypeScript) github/Auto_Avail

- when2meet-style scheduler using location data to generate continuous availability periods.
- Stack: Supabase, Flutter, React Native, Postgres, pgTAP, Expo, TypeScript.

CHelp (C) github/CHelp

- Valgrind alternative: tracks dynamic allocations and catches memory issues early.

Autoheader (Rust) github/autoheader

- Automatically generates C header files.

LeetCode: leetcode.com/u/HenryRoutson
